

Now Year-Round:

Outdoor watering is prohibited from 10 a.m. to 6 p.m. Year Round

Arlington has extended the time of day irrigation requirements for lawns and landscapes. Except for hand watering and soaker hoses, it is unlawful for a person to water, or cause the irrigation or watering of any landscape between the hours of 10 a.m. and 6 p.m. throughout the year.

Watering during the cooler parts of the day will save water and money. Watering during the warmest part of the day results in significant water loss to evaporation.

Save Arlington Water:

Consider a Low Water Use Landscape

Native plants, trees, and grasses are beautiful, drought tolerant and have lower water requirements.

Visit www.txsmartscape.com
to plan a low water use landscape.

Deadline for Commercial and Apartment Property Ordinance Compliance

Beginning in March, all commercial and apartment landscape irrigation systems in Arlington must be equipped with rain and freeze sensors.

The owners of commercial and apartment properties have until March 4, 2007 to equip their irrigation systems with rain and freeze sensors.

Rain and freeze sensors are required on all residential irrigation sprinkler systems installed on or after January 1, 2007.

These devices help to conserve water, said Water Utilities Director Julie Hunt. The automated devices stop irrigation systems from operating during icy weather conditions and during or immediately after rainfall.

The City of Arlington will use several methods to promote compliance with water conservation ordinances, including public education campaigns in the water bill and on television, radio, internet and newspapers throughout the year. Citations could be issued when compliance is not achieved. A citation can result in a fine up to \$500.
